STRUCTURED CABLING	·····
Horizontal Cabling	Maintain proper cable bend radius of 4 times the cable's outer diameter during place
Requirements	No splices are permitted.
Copper cable shall be Category 6 plenum rated cable (blue in Color) for all work station drops.	 No link shall exceed 90 meters. Contractor is responsible for verifying proper footage Pull one additional "Mule Tape" or ¼" Nylon rope when pulling cables through any c
• Copper cable shall be Category 6 plenum rated cable (White in Color) for all Security camera drops.	
Copper cable shall be Category 6 plenum rated cable (Yellow in Color) for all Wifi drops.	 Mule Tape or Nylon rope is to be pulled into conduit separately and after all other ca installed.
Approved Category 6 cables are as follows.	 Install sleeves when puncturing walls.
Superior Essex Cat6 Plenum Part #'s 77-240-2B blue 77-240-4B white	 Cable shall not be installed between cinder block walls and roof decking.
77-240-6B yellow 77-240-5B green	 Cable shall not be installed between red iron and roof decking.
Mohawk Cat6 Plenum Part #'s M58281B Blue	 Firestop all sleeves and conduit openings after cable installation.
M58280B white M58283B yellow	Terminate all pairs and conductors at all ends according to manufacturer's instruction
M58286B green	
Berk-Tech Cat6 Plenum Part #'s 10136226 blue 10136230 white 10136749 yellow	 No splices are permitted in any fiber optic cable except when terminating connector Terminate all Fiber pairs.
10136748 green	 All optical fiber cable shall be installed in the fiber panels in accordance with the ma
General Cat6 Plenum Part #'s 7131800 blue 7131841 white	 Optical fiber Back bone cable length shall not exceed 300 meters.
7131802 yellow 7131806 green	Copper backbone cable length shall not exceed 90 meters.
	All back bone cables (Fiber and Copper) shall have 20' of slack at both ends.
	Corning rack mount fiber patch panels are to be used where applicable.
Connector shall be Leviton part # 61110-RO6 eXtreme 6 connector for all workstation drops.	• Outdoor rated fiber will be used for all outdoor fiber runs.
 Connector shall be Leviton part # 61110-RW6 eXtreme 6 connector for all Security camera drops. Connector shall be Leviton part # 61110-RY6 eXtreme 6 connector for all Wifi drops. 	Stress relief cable and the appropriate building fastener will be used on all aerial ru
 Contractor shall provide Moore Public Schools, Technology Department, one 5' category 6 patch cord 	All aerial cables will be fastened to the stress relief cables.
in color) for each category 6 work station cable installed. To be installed by contractor at the network cabinet.	
 Contractor shall provide Moore Public Schools, Technology Department, one 10' category 6 patch co 	 A trace wire and warning tape will be buried with all buried runs ord,
(blue in color) for each category 6 work station cable installed. Leave in box at network cabinet. To be installed by MPS Technology Dept.	
Contractor shall provide Moore Public Schools, Technology Department, one 5' category 6 patch core	
(White in color) for each category 6 Security Camera cable installed. To be installed by contractor at in network cabinet.	
Contractor shall provide Moore Public Schools, Technology Department, one 10' category 6 patch co (M/bits in calca) for each extense: 6 Security Compare cable installed Leave in her extenses	
(White in color) for each category 6 Security Camera cable installed. Leave in box at network cabinet installed by MPS Technology Dept.	 Install all horizontal cables and termination frames in accordance with manufacture Labeling
 Contractor shall provide Moore Public Schools, Technology Department, one 5' category 6 patch core (Yellow in color) for each category 6 Wifi cable installed. To be installed by contractor at the networ 	rd,
cabinet.	Machine label all termination panels and face plates with cabinet and cable number
 Contractor shall provide Moore Public Schools, Technology Department, one 10' category 6 patch co (Yellow in color) for each category 6 Wifi cable installed. Leave in box at network cabinet. To be instal 	prd,
MPS Technology Dept.	 A single drop will be labeled a total of four times. The labels will be located on the particular states and the particular states are stated as total of four times.
• Each cable shall be terminated on the patch panel in data closets.	on both ends of the cable, and on the face plate at the work station end. The labels same in all four locations.
All Category 6 connectors shall be placed into QuickPort faceplates at the workstation end.	• All 5' patch cables will be labeled at both ends. 5' cables will be installed at the cabi
 Faceplate shall be Leviton part # 41080-6wp No substitutions. 	 Numbering scheme will be 00-000 where the first two digits are the cabinet number the drop number. Example, drop number 75 in cabinet 2 will read, 02-075.
	 Camera drop labels numerically start at 500 in each cabinet. If camera drops alread
Communications Backbone Cabling	the next available consecutive number will be used.
equirements - Optical fiber	 WiFi drop labels numerically start at 800 in each cabinet. If WiFi drops already exis available consecutive number will be used.
• 1 Optical fiber cable shall be run from the MDF to each IDF.	Example for cabinet 1:
Fiber shall be terminated with LC connectors.	Data (blue cable orange jacks) 01-001 to 01-499 Camera (white cable white jacks) 01-500 to 01-799
Optical fiber cable shall be plenum rated Laser Optimized 50 micron Multi Mode distribution fiber.	WiEi (vollow ophlo vollow jooko) 01 800 to 01 000
	WiFi (yellow cable yellow jacks) 01-800 to 01-999
 Optical fiber cable shall be an OM3 rated cable guaranteed to support 10 Gigabit Ethernet for 300 me using 850 nm wavelength. 	• Label all fiber optic cables at both ends on the cable and in the break out box
	eters • Label all fiber optic cables at both ends on the cable and in the break out box Test
using 850 nm wavelength.	eters • Label all fiber optic cables at both ends on the cable and in the break out box Test
Optical fiber cable shall have 24 strands using industry standard color coding.	 Label all fiber optic cables at both ends on the cable and in the break out box Test Test results for all Category 6 copper and fiber optic cables shall be provided to Model
 Optical fiber cable shall have 24 strands using industry standard color coding. Optical fiber cable shall have a flame retardant and low smoke FEP jacket. 	 Label all fiber optic cables at both ends on the cable and in the break out box Test Test results for all Category 6 copper and fiber optic cables shall be provided to Mo Technology department.
 using 850 nm wavelength. Optical fiber cable shall have 24 strands using industry standard color coding. Optical fiber cable shall have a flame retardant and low smoke FEP jacket.  using 850 nm wavelength. Optical fiber cable shall have 24 strands using industry standard color coding. Optical fiber cable shall have a flame retardant and low smoke FEP jacket. Optical fiber cable shall support 10GBase-SX applications for the life of the system. Optical fiber cable shall be armor jacketed or protected inside plenum rated plastic inner duct orange aqua in color. MIC Tight-buffered 024T88-33180-A3 No substitutions. Requirements - Copper backbone 6 Cat 6 cables shall be run from the MDF to each IDF. 3 Cat 6 cables shall be run from the phone Dmark to the MDF. Copper cable shall be Category 6 cable. Green in color Connector shall be Leviton part # 61110-RV6 eXtreme 6 connector. Each cable shall be terminated on the patch panel in data closets. Each cable shall be terminated on the patch panel in data closets. Each cable shall be terminated using the T568B pin/pair assignment. No substitutions. Cable Installation Properly support horizontal cables in ceiling every 4'-5' using J-Hooks or cable tray only. (no slings, pouches, or D rings.) Place horizontal cables in pathways and spaces dedicated for communications cables. No pathways be in or above the red iron. Data cable will be run in separate pathways from all other cables. Provide 30' of slack at station end in ceiling and not inside wall. Slack shall be rolled neatly in a 2' loop and hanging from a j-hook in ceiling above drop location. 	eters • Label all fiber optic cables at both ends on the cable and in the break out box Test • Test results for all Category 6 copper and fiber optic cables shall be provided to Mo Technology department. Por End of Section Por Communications Equipment Room Fittings Equipment rack • Free standing equipment rack shall be Chatsworth #55053-703. • Free standing racks shall be sized to accept 19" spaced equipment and handle a to pounds. • Free standing racks shall have 3" side rails tapped on both sides with universal hole 12-24 screws. • No substitutions. Copper Patch panels • Patch panel shall be a Leviton #49255-H24 Quick Port 110 panel with cable manage • Patch panel shall have 24 ports taking up 1 rack mount unit. • No substitutions. Horizontal cable management • Horizontal cable management • Vertical fiber patch panel / enclosure • Optical fiber enclosure shall be Coming LC loaded rack mount
